## SHOCK COLLAR UPGRADE HUSQVARNA/KAWASAKI/KTM/SUZUKI/GAS GAS

### NEW PRELOAD SHOCK COLLARS

The problem with the OEM preload collars for the 2019-2021 KX450, 2017-2021 RM-Z450, 2016-2021 KTM/Husqvarna and the 2021 Gas Gas models is its plastic composition. During use, the heat omitted from the shock body heats up the plastic as well. A combination of this, along with dirt working its way underneath, the plastic collar becomes deformed, which makes tuning and adjustment extremely difficult. Pro Circuit's solution is very simple. We now offer a CNC-machined 6061 aluminum preload collar with a zinc-plated steel lock ring for improved durability and much easier adjustments. Discard your problematic, plastic OEM preload collar and replace it with Pro Circuit's new preload collars to make future shock preload adjustments a breeze.

## PRO CIRCUIT LINKAGE SYSTEM **KAWASAKI MODELS**

---

### LINKAGE SYSTEM

The new Pro Circuit linkage system for the 2021 KX250/KX250X, 2019-2021 KX450 and 2021 KX450X bring the bike's handling performance to an entirely new level. The stock OEM linkage system for these newer models tends to be harsh and stiff at the beginning of the stroke and gets softer as the rear wheel goes deeper into the stroke. With the new Pro Circuit linkage system, it's the complete opposite. The Pro Circuit KX250/KX450 linkage system is plusher at the beginning and stiffens up as the rear wheel goes deeper into the stroke. This adjustment lessens the need for stiffer high-speed valving, which can cause the rear to feel harsh and deflective. A considerable amount of research and testing for this new linkage system has resulted in a more true-to-weight spring rate to reach the ultimate sweet spot in handling for your new KX250/KX450. Ultimately, the new linkage creates a plush feel while increasing traction.

### LINKAGE AVAILABLE FOR:
